

CONSTRUCTION NOTICE

SANTA FELICIA DAM 2020 DRILLING PROGRAM PLAN

August to November 2020

WHAT'S HAPPENING: United Water Conservation District will begin drilling of shallow bore holes at Santa Felicia Dam as part of the Santa Felicia Dam Safety Improvement project. During the mobilization on August 17, 2020, drilling rigs and construction equipment will be transported to the dam through Piru Downtown. For the duration of the work, the equipment and drilling rigs will mainly be stored at the dam. Upon completion of the work in November 2020, the drilling rigs and construction equipment will be transported from the dam through Piru Downtown. This will have minimal impact on the traffic through Piru Downtown.

SAFETY PRECAUTIONS: The necessary safety precautions will be taken during the transportation of the construction equipment to and from the dam site.

WHERE: Equipment will be transported to the Santa Felicia Dam through Main Street and Piru Canyon.

WHEN: Mobilization is scheduled for August 17. The drilling activities are expected to continue through September and October, and end in November 2020.

IMPACTS: Construction noise may be heard near the work area.

STAY INFORMED: To receive information about the Santa Felicia Dam 2020 Drilling Program Plan please call United Water Conservation District at (805) 525-4431.
