Board of Directors Michael W. Mobley , President Bruce E. Dandy , Vice President Sheldon G. Berger , Secretary/Treasurer Lynn E. Maulhardt Edwin T. McFadden III Daniel C. Naumann Patrick J. Kelley

General Manager Mauricio E. Guardado, Jr.

Legal Counsel David D. Boyer

June 24, 2020

Board of Directors United Water Conservation District

Subject: Adopted Budget for Fiscal Year 2020-21

Honorable Board Members:

Introduction

Enclosed is the Adopted FY 2020-21 Budget for the District. As required by the District's Budget Submittal Policy, the General Manager presented the draft budget to the Board and District ratepayers in May in order to provide sufficient review and discussion time prior to final adoption in June 2020.

The schedule for the budget review period will be as follows:

	•	Oxnard Hueneme Pipeline users met to discuss the propose budget and rates (required by Water Delivery Agreement)					
May 1 – June 9	•	Budget document review period					
May 13	•	Pumping Trough Pipeline users meeting to discuss proposed budget and rates					
May 27	•	Budget Study Session					
June 10	•	Board of Directors request staff to prepare revised budget with ne groundwater rate increase from FY19-20					
June 24		Board to consider Revised Proposed Budget for adoption					

The Budget Development Process

At their May 27 meeting, the Board of Directors reviewed the Proposed Budget developed by District staff and voted to consider that budget for adoption at their regular June meeting. Over the weeks subsequent to the May meeting, as the scope of the health and economic emergency became clearer, the board considered the calls from city officials in the District and other community members to suspend the groundwater rate increase in the Proposed Budget.

During the June 10 meeting, the Board asked District staff to look for alternatives to the expenditures planned for FY201-21 with the objective of revising the budget to keep

groundwater extraction rates unchanged from FY19-20. Staff then identified a number of areas where projects can be delayed or reduced in scope in order to reduce expenditures commensurately to the reduction in revenue as a result of holding groundwater rates flat.

This document is staff's proposal which, if adopted will be the Board's policy document providing organizational and financial directives to staff for the next 12 months, in keeping with the overall mission of the District.

While this budget reflects our best estimates of the operating expense and capital needs for the coming year, based on all available information at the time of publication, it must be a flexible plan. Changing economic conditions and unanticipated operating, legal or legislative developments will require that the plan be revised through supplemental appropriations and/or modifications of expenditures. Any changes made throughout the fiscal year will be clearly documented and reviewed monthly by the Finance Committee. Staff reports will contain fiscal impact information and identify funding sources to cover resulting budget increases. All recommended revisions to the adopted budget during the fiscal year will be presented to the Board for discussion and approval in accordance with the District's Budget Amendment Policy.

The District's entire budget is developed in the context of the District mission—to protect and augment water supplies for the benefit of the residents and businesses within the District—and is guided by the priority and policy direction provided by the District Board.

To prepare the budget, Finance staff reviewed current levels of spend, identified mandatory COLA and inflationary increases, sought out areas of efficiency gains where costs would increase at less than the rate of work or material increase. From there, we determine what new operational, legal/compliance and capital project activities will be required in the coming year in order to continue improvement in the District's ability to meet its mission.

Although United's recharge and other water conservation efforts may not be uniform in each area of the District on an annual basis, over time the information available to the District clearly shows that the District's conservation efforts benefit the entire service area. In order to apportion those costs which are not directly related to one specific zone or facility (e.g., pipeline), staff uses Board policies and guidelines as well as their professional judgment to allocate the costs to one or more zones/facilities in a consistent and fiscally sound manner. For an example of how the District apportions cost over multiple funds, please see the Environmental Activities Cost Allocation Policy in the District's Financial Policies document.

Groundwater extraction and water delivery charges are then calculated identifying all necessary expenditures for operations, asset replacements and reserve requirements. Consistent with its statutory mandate under the California Water Code, the net expenditures covered by the extraction charges are divided by the projected groundwater extraction volumes for each zone. The results provide the lowest statutorily allowable 3:1 ratio (municipal and industrial to agricultural) charge to customers. Quantitative analysis providing factual support for the 3:1 ratio between agricultural water and non-agricultural water charges is provided at the Board's May Budget Workshop and at the June 10 Public Hearing. The analysis demonstrated that rates of groundwater charges:

• Are necessary to carry out the District's regulatory mission;

- Do not exceed the reasonable cost of providing the services necessary to the activity on which the fees are based; and
- That the cost allocation method bears a fair and reasonable relationship to the payer's burdens on, or benefits received from, the District's activity.

As always, in determining what is to be included in the budget, staff considers the following:

- Status Quo Operations The budget should include only the minimum funding needed to run the District's current operations, with limited discretionary funding. Necessary or operational efficiency maintenance should not be deferred. At the same time, staff should pursue continuous improvement opportunities and consider minimizing or eliminating any status quo operations that no longer need to be performed.
- Continuing the District's long-standing mission proactive awareness and accountability of our regulatory mission as a groundwater guardian (i.e. planning and preemptive action) that guides our efforts in balancing a limited supply of water for use by people and the environment.
- Address safety issues for employees, and protection of District assets and constituents.
- Address all mandated or legal requirements of the District.
- Ensure the financial stability capabilities of the District and ensure that appropriate and/or reasonable reserve levels for all funds are maintained in accordance with the Reserve Policy. In the future, the Board may need to consider increasing the reserves as the District addresses legal/regulatory mandates, undertakes large infrastructure improvements and makes long-term water-purchasing plans.
- Address major rehabilitation or replacement for key District infrastructure that are necessary due to the aging process before more serious emergency repairs are needed.

Staff is proposing a balanced budget to the Board. The budget successfully incorporates all of the aforementioned priorities and includes rate increases to ensure the advancement of the District's mandates and mission. The budget is fiscally prudent and, staff believes, in the best interest of the District and our ratepayers. Each fund's spending plan and estimated funding resources will be discussed later in this document.

FY 2020-21 Budget Summary

Despite experiencing a rather wet 2019, we are now in a drier than normal year and water conservation and protection remain critical. While conservation and protection of the aquifers is the core of the District's mission, extensive regulatory and legal circumstances, aging infrastructure, and the critical need for new/alternative water sources are challenging District resources. The budget attempts to 1) continue progressing with environmental and regulatory compliance matters (specifically ESA and FERC compliance), 2) address immediate infrastructure needs as well as prepare for future capital costs, and 3) explore alternatives and technological options that advance the District's core mission of water conservation.

The Capital Improvement Project (CIP) budget for FY 2020-21 is \$11.3 million. The largest project planned for next year is Iron and Manganese Treatment for the OH Pipeline, where construction is planned to commence in FY 2020-21. This project, as well as the installation of an emergency generator to service the OH Pipeline, will make up \$4.9 million of the CIP budget. Other projects in the coming year are the ongoing work of repairs and improvements at the Santa Felicia dam and the Freeman diversion, as well as development of the Ferro-Rose Recharge, Brackish Water and Recycled Water Treatment projects. A detailed list of CIP projects is found beginning on page 53 of the budget document.

Personnel costs are \$10.9 million for FY 2020-21. This is an increase of \$500 thousand from the prior year and reflects contractually mandated cost of living increases and step increases in salaries as well as increases in medical insurance and other benefits. A more comprehensive list of staffing levels is located on page 17 of the budget.

Included in the budget are \$585 thousand of Capital Outlay costs that are summarized on page 20 of the budget document. The planned Capital Outlay includes \$260 thousand for replacement of District vehicles that had been postponed in past budgets. As a consequence, the maintenance costs of these vehicles have outstripped the vehicle value.

A total of \$6.0 million is included in the budget for contractual services. \$0.9 million is related to FERC and ESA/HCP compliance matters (excluding legal costs), another \$3.0 million is for all legal services. Judicial court developments have made it necessary to create a legal reserve. \$355 thousand is planned for PMC, the concessionaire at the Lake Piru recreation area. A summary list of all contractual services is located on page 20 of the budget document.

The budget also includes allocations of \$2.5 million for FY 2020-21 to meet the District's debt service obligations. This has increased from the prior year in anticipation of taking on more debt to support the ambitious CIP planned in FY 2020-21. Other general operating expenditures account for the remaining expenditures in the budget.

As mentioned above, groundwater extraction rates will remain unchanged from the current year. All rates are discussed further below in this letter and a complete table of groundwater and pipeline rates is found on page 11.

The budget also includes rate adjustments for the three pipeline funds (Oxnard Hueneme, Pleasant Valley, and the Pumping Trough Pipeline) as described in the Operating Funds Overview section of this letter. These rate adjustments are essential to continue operation of these enterprises and maintain required reserve levels.

Operating Overview

Groundwater Pumping and Pipeline Rates:

As the District is committed to consistently improving the water supply available to its users as well assuring that that supply is available when and where the users need it, the financial resource demands on the District will grow substantially in FY 2020-21. Operating expenses are planned to increase by 5%. These increases will support, among other things, improved dam safety at Santa Felicia and a rehabilitation of the Freeman diversion—all while navigating the ever-changing legislative and regulatory currents that govern our operations. While total CIP

expenditure will increase as large projects advance toward construction, due to carryovers from FY 2019-20, new CIP appropriations for the year will decrease by 14% to \$11.3 million.

The adopted groundwater extraction rates reflect the minimum 3:1 rate ratio for non-agricultural (M&I) water to Agricultural water *required* by the California Water Code. The California Water Code authorizes the District to set the M&I to Agricultural rate ratio as high as 5:1. In 2017, the California Supreme Court ruled that the District's extraction charges are not subject to Proposition 218. The District, however, must meet its burden of showing compliance with Proposition 26 to the extent that the groundwater extraction charges provide different rates for agricultural water and for non-agricultural water. Since FY 2013-14, the District has conducted two cost-of-service rate analyses (studies) to provide quantitative factual support for the different rates. The updated analyses for FY 2020-21 was considered by the Board prior to its final action on the adopted Water Conservation Extraction Charges

The charts below illustrate the history of the District's groundwater extraction rates over the past ten years and the year-on-year dollar growth in the rates. Further detail on rates for FY 2020-21 can be found on page 11.

Revenue:

The table on the following page outlines the projected revenue for FY 2020-21 along with a breakdown by fund and revenue type. The same figures are provided for FY 2019-20 for purposes of comparison. Note that this table only includes revenue from the ordinary course of business—property taxes, pumping and delivery charges. It does not include proceeds from debt issuance or from the disposal of assets.

in USD'000s	General/Water Conservation Fund	State Water Fund	Freeman Fund	OH Pipeline Fun	PV Pipeline Fund	PT Pipeline Fund	TOTAL
Budget 2020-21							
Property Tax	2,828	719					3,547
Water Deliveries	1,781		1,101	3,783	134	2,224	9,024
Groundwater	10,563		3,257				13,820
Other	1,418	19	64	550	9	245	2,822
Revenue	16,590	738	4,423	4,333	143	2,469	29,213
Budget 2019-20							
Property Tax	2,873	1,623					4,496
Water Deliveries	1,840		1,138	4,211	323	1,928	9,440
Groundwater	11,689		3,502				15,191
Other	1,066	41	100	509	16	513	2,799
Revenue	17,468	1,664	4,740	4,719	338	2,441	31,926
Variance							
Property Tax	(45)	(904)	0	0	0	0	(949)
Water Deliveries	(59)	0	(37)	(428)	(189)	296	(416)
Groundwater	(1,126)	0	(245)	0	0	0	(1,371)
Other	352	(23)	(36)	42	(7)	(268)	23
Revenue	(878)	(927)	(317)	(386)	(196)	28	(2,713)

Groundwater revenue down \$1.4 million on lower planned pumping volumes (vs FY 2019-20 Budget).

- The budget for the State Water Import Fund includes a separate voter approved property tax assessment of \$719 thousand to cover fixed and prior year variable costs associated with the District's State Water agreement. Property tax decrease reflects the funding required to purchase 100% of Table A State Water allocation.
- OH Pipeline revenue down as higher-than-planned delivery volumes in the current fiscal year generate excess revenue that partially offsets expenses in the coming fiscal year. The carryover is reflected in the lower fixed and variable rates for the OH Pipeline. Other includes \$300K Bureau of Reclamation grant for the Iron and Manganese CIP.
- Other Revenue includes investment income and rent.

Water Purchase Fund—in FY 2019-20, the District created a new fund, dedicated to financing supplemental water purchases in order to boost the recharge of aquifers in the district. The fund has no operating expenses other than for the purchase of water. Revenues for the fund will come from a surcharge levied on each acre-foot of water pumped from the aquifers. The surcharge for FY 2020-21 will be \$2.24 for Agricultural users and \$6.72 for M&I users. The District expects to raise approximately \$500 thousand per year in the coming year from the surcharge.

The Water Purchase Fund was supplemented in FY2019-20 by a grant from the Fox Canyon Groundwater Management Agency This grant enabled a recharge of 15,000 acre-feet to the Oxnard Plain. Also, along with the proceeds from the water purchase surcharge, the grant brought more than 6,600 acre-feet of additional imported water to the District in FY19-20—water that would otherwise not have been available to District users.

This fund is considered a sub-fund of the General/Water Conservation Fund for financial reporting purposes but is presented separately for budgeting purposes.

Groundwater Pumping Volume

Forecasting groundwater demands for the coming year is an inexact science. Variables such as weather, user conservation efforts and alternative sourcing are difficult to predict. This year, the economic impact of the current health crisis, particularly on the agriculture industry, adds another level of uncertainty to the forecast. For the purposes of this budget, we looked at the past five years of pumping history and took into account most recent developments such as the unusually dry January and February 2020. The FY 2020-21 Budget volume forecast is 9% lower than what was forecast for FY 2019-20 during the budget for that year. However, pumping volumes in the first half of FY 2019-20 were 10% below the budget for that period. Given the level of rainfall in early 2020, we are planning pumping volumes for the second half of the fiscal year to be in line with the budget. Therefore, we are taking a conservative approach to our forecast for groundwater extraction in FY20-21 and planning total extraction volumes at 90% of the median extractions over the past ten years. The history and forecast of groundwater extraction by District zone in the table below.

Groundwater Pumping Volume	History	ii	n acre-feet				
Fiscal Year Ending	2016	2017	2018	2019	2020	2021

Operating Expense

The following table outlines projected Operating Expense for the next fiscal year.

	General/Water Conservation	State Water	Freeman	OH Pipeline	D\/ Dinolino	PT Pipeline	
in USD'000s	Fund	Fund	Fund	Fun	Fund	Fund	TOTAL
Budget 2020-21							
Direct Personnel	4,742		854	826	48	390	6,859
Operating Expenditures	6,530	1,876	2,960	2,665	86	1,619	15,735
Depreciation	1,323		368	462	76	488	2,716
Overhead	2,854	0	724	576	52	433	4,638
OPEX	15,448	1,876	4,905	4,528	262	2,930	29,948
Duda - 1 2010 20							
Budget 2019-20							
Direct Personnel	4,504		738	886	30	417	6,575
Operating Expenditures	6,454	1,750	2,104	2,813	225	1,358	14,705
Depreciation	1,260		350	430	72	460	2,572
Overhead	2,770	0	723	619	48	430	4,589
OPEX	14,989	1,750	3,915	4,748	374	2,665	28,441
Variance							
Direct Personnel	237	0	116	(61)	19	(28)	283
Operating Expenditures	76	125	856	(148)	(139)	261	1,031
Depreciation	63	0	18	32	4	28	144
Overhead	83	0	1	(43)	5	3	49
OPEX	459	125	990	(219)	(112)	264	1,507

- Direct Personnel does not include headcount in executive/administrative positions, which are captured in the Overhead expense category above.
- Increase in Direct Personnel due to contractually mandated cost-of-living increases as well as increased health insurance and pension costs.
- Other drivers of the increase in General and Overhead include enhanced legislative outreach and public education efforts
- Freeman Operating Expenditure driven by regulatory and legal requirements related to environmental impact of diversion facility as well as legal challenges to that facility.

The budget aims to finish the fiscal year with a cash reserve of \$4 to \$5 million, consistent with the Reserve Policy. The Reserve Policy allows the District the flexibility to manage cash flows in the General/Water Conservation Fund, in light of the fact that a majority of the groundwater extraction revenues are received between February 1 and August 1, while the property tax receipts are received in December and May. Ensuring sufficient reserves is fiscally responsible and essential to responding to the demands placed on the District and the uncertainties that come with operations and aging infrastructure and dynamic environmental and legal mandates.

Capital Improvement Project Plan

A Five-Year (FY 2020-21 through FY 2024-25) Capital Improvement Plan is included in this document, along with project detail pages. The plan provides insight as to the projects necessary to be completed or being considered by the District in the very near future.

Appropriations and the necessary funding approved in prior years by the Board for CIP continues to be appropriated and carried forward from year to year until the CIP is completed or closed out. The Board can only appropriate new funding one year at a time to avoid committing future Boards to financial responsibilities over which they had no authority. By approving

Fiscal Year 2020-21 Budget United Water Conservation District June 24, 2020

funding for a CIP in FY 2020-21, the Board is indicating that this is a project which they would like to see implemented and/or completed. Future funding needs would be requested on an annual basis and would indicate the on-going support of a project.

The Five-Year Capital Improvement Project Plan is shown on page 55 of this document. It is projected that \$9.7 million in CIP funding/appropriations will be carried over from FY 2019-20. Of this carry over amount, 100% is already funded, with funds included in the appropriate CIP Fund and designated for the individual projects. New or additional funding for CIP totaling \$11.3 million for FY 2020-21 is recommended with identified resources coming from transfers from the operating funds or financing proceeds.

The largest projects in terms of expenditures in FY 2020-21 are Iron and Manganese Treatment (\$4.0 million), Freeman Diversion Rehabilitation (\$3.8 million), and the Santa Felicia dam safety improvements (two projects totaling \$4.6 million).

Conclusion

This letter provides a high-level view of the adopted operating budget for FY 2020-21 and is intentionally brief. Full detail on the rates, revenue and expenditure of each fund is found in the body of this document. All the District funds' budgets for FY 2020-21 are balanced, as adopted by the Board.

Respectfully submitted,

Mauricio E. Guardado, Jr. - General Manager

Joseph Jereb - Chief Financial Officer

RESOLUTION 2020-12

A RESOLUTION OF THE BOARD OF DIRECTORS OF UNITED WATER CONSERVATION DISTRICT ADOPTING THE PROPOSED DISTRICT BUDGET, FINANCIAL POLICIES, OVERHEAD ALLOCATION METHOD, STAFFING LEVELS AND SALARY SCHEDULES FOR FISCAL YEAR 2020-21 AND APPROPRIATION CARRYOVERS FOR FISCAL YEAR 2020-21

SECTION 1. FISCAL YEAR 2020-21 BUDGET

WHEREAS, the General Manager, on May 1, 2020, submitted the Proposed Budget Plan for United Water Conservation District for the Fiscal Year 2020-21, commencing July 1, 2020; and

WHEREAS, as required by the "WATER SUPPLY AGREEMENT FOR DELIVERY OF WATER THROUGH THE OXNARD/HUENEME PIPELINE" the following activities were undertaken by the District:

- 1. A preliminary draft of the District's Fiscal Year 2020-21 Budget Plan, including the Oxnard/Hueneme Pipeline Fund (OH) budget, was submitted to the contractors for their review on May 1, 2020;
- 2. The preliminary draft of the budget included a summary of projected water deliveries; fixed and variable costs and projected fixed, variable and marginal rates;
- 3. The District held an OH contractors' meeting on May 12, 2020; and

WHEREAS, a Board of Directors' Budget Workshop was held on May 27, 2020, and at this May 27, 2020 study session the following was reviewed and discussed:

- 1. The budget preparation process; and
- 2. The FY 2020-21 Budget Plan and five-year CIP Plan, as recommended by the General Manager, and

WHEREAS, the Board of Directors conducted a hearing on June 10, 2020 to discuss and consider the proposed Fiscal Year 2020-21 Budget Plan as originally submitted and voted to continue the hearing to June 24, 2020, to allow the Board and the public to review a Fiscal Year 2020-21 Budget Plan-Revised, which reduces or delays Capital Improvement projects in an effort to maintain FY 2019-20 groundwater extraction rates in recognition of the financial hardships of both municipalities and individual customers resulting from the COVID-19 pandemic. RESOLUTION 2020-12 (continued)

NOW, THEREFORE, BE IT RESOLVED that the Board of Directors of United Water Conservation District, hereby approves and adopts the Fiscal Year 2020-21 Budget Plan-Revised as proposed to the Board of Directors on June 24, 2020, with the following revisions, as directed by the Board:

SECTION 2: FISCAL YEAR 2019-20 APPROPRIATION CARRY-OVERS (Encumbrances)

WHEREAS, the completion of District work does not necessarily coincide with the calendar dates of the fiscal year, and as such work is in progress, contracts are in progress, or work otherwise is unavoidably delayed beyond June 30, 2020;

NOW, THEREFORE, BE IT RESOLVED that the Board of Directors of United Water Conservation District hereby authorizes the carryover of specific appropriations from one budget year (FY 2019-20) to the next (FY 2020-21) to complete Board authorized work plan(s) and other operating needs, and therefore, effective June 30, 2020 before closing the District's financial accounting records for FY 2019-20, the Board of Directors hereby appropriates and authorizes the carryover in the General/Water Conservation Fund and other specified District funds for use in FY 2020-21, those appropriations from the Fiscal Year 2019-20 Budget deemed necessary by the General Manager to complete specific projects or services that could not be finalized prior to June 30, 2020.

SECTION 3. FISCAL YEAR 2020-21 FINANCIAL POLICIES

BE IT RESOLVED that the Board of Directors of United Water Conservation District hereby approves the following financial policies as submitted by staff in the proposed Fiscal Year 2020-21 District Budget:

- 1. Accounts Receivable/Write Off Policy
- 2. Accounts Receivable Collections Policy
- 3. Auditor Rotation & Selection Policy
- 4. Budget Amendment Policy
- 5. Budget Submittal Policy
- 6. Capital Asset Policy
- 7. Debt Management Policy
- 8. Disposition of Surplus Assets Policy
- 9. Disputed or Revised Groundwater Pumping Records
- 10. Employee Recognition Policy
- 11. Engineering Projects and Administration Policy
- 12. Environmental Activity Cost Allocation Policy
- 13. Expense Policy Staff
- 14. Expense Policy Board Members and District Executives

RESOLUTION 2020-12 (continued)

- 15. Fraud Prevention/Detection Policy
- 16. Groundwater Well Registration & Inactive Well Policy
- 17. Identity Theft Prevention Program Policy
- 18. Investment Policy
- 19. Procurement Policy
- 20. Records Management Retention and Destruction Policy
- 21. Reserve Policy
- 22. Vehicle and Equipment Replacement and Maintenance/Repairs Schedule and Policy
- 23. Verification of Groundwater Production Statement

SECTION 4. OVERHEAD ALLOCATION METHOD

WHEREAS, District management has reviewed the relationship of overhead expenses to the various funds and programs of the District; and

WHEREAS, the review considered the relative proportion of each fund's expenditures to total operating expenditures, the units of billings per fund, the direct labor hours worked in each fund, the number of accounts payable transactions in each fund and the revenue generated in each fund based on prior year activity; and

WHEREAS, in the judgment of management and after review by the Finance and Audit Committee the following allocation of overhead expenses is equitable, proportional and rational;

NOW, THEREFORE, BE IT RESOLVED that the Board of Directors of United Water Conservation District hereby approves District overhead expenses to be proportionately allocated for Fiscal Year 2020-21 to the District's operating funds as follows:

General/Water Conservation Fund	61.53%
Freeman Fund	15.60%
OH Pipeline Fund	12.41 %
PV Pipeline Fund	1.13 %
PT Pipeline Fund	9.33 %
Total	100.00 %

SECTION 5. STAFFING LEVELS AND SALARY SCHEDULES

BE IT RESOLVED that the Board of Directors of United Water Conservation District hereby approves the Position Titles and Annual Salary Ranges and Staffing Levels as amended in the proposed Fiscal Year 2020-21 Budget Plan.

RESOLUTION 2020-12 (continued)

ADOPTED AND PASSED this 24th day of June 2020.

UNITED WATER CONSERVATION DISTRICT

United Water Conservation District covers about 214,000 acres in central Ventura County, California. Considered one of the prime agricultural areas of the world, the year-round growing seasons support high-value crops such as lemons, oranges, avocados, strawberries, berries, row crops and flowers. The District administers a basin management program for all of the hydrologically connected groundwater basins within its boundaries utilizing the surface flow of the Santa Clara River, its tributaries, and other activities for replenishment of groundwater.

United's facilities include the Santa Felicia Dam; Lake Piru Recreation Area; Saticoy (including Noble, Ferro and Rose), El Rio and Piru Spreading Grounds; the Freeman Diversion; the Saticoy Well Field; Pleasant Valley, Oxnard-Hueneme and Pumping Trough water delivery systems including wells, reservoirs and booster pumping stations.

United is one of the State's few legislatively established Water Conservation Districts. In performing its District-wide Water Conservation efforts, United recharges the aquifers and fights seawater intrusion into the aquifers.

DISTRICT DIVISION BOUNDARIES

UNITED WATER'S BOARD OF DIRECTORS

United Water's Board has seven directors serving four year staggered terms, elected by divisions within the District.

MICHAEL W. MOBLEY PRESIDENT

Mr. Mobley represents Division 2, which encompasses the area immediately west of Santa Paula to Highway 101 at Central Ave, and includes Saticoy, El Rio and the eastern portion of the City of Ventura. He is

a lifelong resident of Ventura and he owns and operates Progressive Land Management, Inc. which provides complete ranch management and consulting services throughout Ventura County and southern Santa Barbara County. Mr. Mobley has served on the boards of numerous trade and community organizations including the California Farm Bureau Federation, Ventura County Farm Bureau (President 1996-97), Ventura County Resource Conservation District (Vice-President, 2004-2014), Boys & Girls Club of Santa Clara Valley (President 2006-2008), and Fillmore-Piru Citrus Association. Mr. Mobley has served on United's Board since 2013. His current term expires December 1, 2020.

BRUCE E. DANDY VICE PRESIDENT

Mr. Dandy represents Division 5 in northwest Oxnard. In October 2013 he retired from the City of Oxnard where he had worked since 1986 as Accounting Manager and previously as Personnel and Employee Relations Manager. He has also served as Exec-

utive Director for the California Junior Chamber of Commerce, Executive Director of the Public Employees Association of Tulare County and General Manager of the Long Beach City Employees Association. Mr. Dandy has long been active in community organizations, including Boy Scouts of America, Muscular Dystrophy Association, Jaycees International and others. He graduated from California State University Long Beach with a bachelor's degree in Political Science and from California State University Northridge with a B.A. degree in Accounting. He has served on United's Board since 2003. His current term expires December 1, 2020.

SHELDON G. BERGER SECRETARY / TREAS-URER

Mr. Berger represents Division 7, which includes portions of the cities of Oxnard and Port Hueneme as well as the CBC Navy Base and several unincorporated beach communities. He also served on the Board of Oxnard

Harbor Association of Realtors, United Way of Ventura Committee, and served as ACWA Region 5 Committee Liaison. He lives in Oxnard and has been a licensed realtor since 1989, and currently serves as a trustee on the Ventura County Association of Realtors BOR-PAC Committee. Mr. Berger has been a member of United's Board since 1983. Mr. Berger currently serves as the Board's Secretary/Treasurer and most recently re-elected to he Board in November 2016. His current term expires December 1, 2020.

DANIEL C. NAUMANN,

Mr. Naumann represents Division 6, the Pleasant Valley area of the District to the south and east of Oxnard. He holds a B.S. degree in Agricultural Business from California Polytechnic State University in San Luis Obispo. He is a member of the

UNITED WATER'S BOARD OF DIRECTORS

Board of the USDA Farm Service Agency. His family established farming operations on the Oxnard Plain in the 1890s and he is currently farming various vegetable row crops. Mr. Naumann's uncle, Robert Naumann, served on United's Board in the 1950s. Continuing the family tradition, Mr. Naumann has been a member of the Board since 1991. His current term expires December 1, 2020.

He is a member of the Board of the USDA Farm Service Agency. His family established farming operations on the Oxnard Plain in the 1890s and he is currently farming various vegetable row crops. Mr. Naumann's uncle, Robert Naumann, served on United's Board in the 1950s. Continuing the family tradition, Mr. Naumann has been a member of the Board since 1991. His current term expires December 1, 2020.

PATRICK J. KELLEY

Mr. Kelley represents Division 3, which includes a large portion of the City of Ventura. He first served on the Board of Directors from 2000 to 2002 and was appointed by the Board to the Division 3 seat in February 2020, filling the seat va-

cated in December 2019. Mr. Kellev has eight years of experience as a dairy nutritional consultant and 33 years of work experience associated with agricultural lending as a loan officer and Branch/Portfolio Manager with Farm Credit Service providing short- and long-term loans, leases, and cash management. His lending duties included loan approval; supervision of staff, and management of large major accounts. He has a working knowledge and resource regarding financial analysis, water rights, commodity conditions, and land issues of the local territory. His volunteer efforts have encompassed coaching youth sport programs and serving as President of the Board of Directors for Ventura Tri-Valley Girls Softball and providing hospice care for family members. Now retired, Mr. Kelley has been a resident of Ventura for some 30 years. and holds a bachelor's degree in Animal Science with emphasis in Agricultural Business Management from California Polytechnic University at Pomona. His current term expires December 2020.

LYNN E. MAULHARDT

Mr. Maulhardt represents Division 4, northeast of the City of Oxnard. His family has been farming in the area since 1869 and he is a managing partner of a Ventura County farm. Mr. Maulhardt is active in community water

activities and has served as chairman of Fox Canyon Groundwater Management Agency from 1987 through 2017. He received a B.S. in Physics from Loyola University in Los Angeles, and a M.A. in Management and Human Relations from Webster University in St. Louis, Missouri. He is a Vietnam War Veteran, having served in the U.S. Air Force as a fighter pilot, and is a retired commercial airline pilot. Mr. Maulhardt has been a member of the Board since 1985. His current term expires December 1, 2020.

EDWIN T. MCFADDEN, III

Mr. McFadden represents Division 1, which encompasses the eastern part of the District, from the western city limit of Santa Paula to the Ventura-Los Angeles County line. He resides with his wife in the Fillmore area where he

farms 460 acres of citrus and avocados. He was raised on a farm in Orange County where he learned early about the municipal side of water by watching his father build and manage Los Alisos Water District. Mr. McFadden serves on the California Avocado Commission, the Farm Bureau of Ventura County, the Fillmore and Piru Basins Groundwater Sustainability Agency and is a member of the Fillmore Rotary Club. Mr. McFadden has been a member of the Board since 2014. His current term expires December 1, 2022.

UNITED WATER'S EXECUTIVE MANAGEMENT TEAM

MAURICIO E. GUARDADO, JR., GENERAL MANAGER—Mr. Guardado joined the District as its General Manager in August 2015. He spent the previous nine years as the Retail Manager/CEO for the Santa Clarita Water Division of Castaic Lake Water Agency, which serves as the water provider for 120,000 residents in Santa Clarita. Prior to that he served as the Director of Engineering for Cucamonga Valley Water District. He holds a B.S. degree in Civil Engineering from Cal State, Northridge and a Master's Degree from USC's Executive Master of Leadership Program, and he is registered civil engineer in the state of California.

ANTHONY A. EMMERT, ASSISTANT GENERAL MANAGER—Anthony Emmert joined the District staff team in April 2014 as Deputy General Manager. Previously, he served eight years as manager of the City of Oxnard's Water Resources Division, which provided water, wastewater, and recycled water services to the City's over 200,000 residents and significant industrial and commercial customers. Mr. Emmert has 28 years' experience in management of water, wastewater, recycled water, storm water, and public works systems, including the design, permitting, funding and construction of significant capital projects. He holds a B.S. degree in Environmental Policy Analysis and Planning, Water Quality, from the University of California, Davis.

UNITED WATER CONSERVATION DISTRICT

MISSION

United Water Conservation District manages, protects, conserves and enhances the water resources of the District and produces a reliable and sustainable water supply for the reasonable, beneficial use of all users.

MISSION-RELATED GOALS

OPERATIONS AND PROJECT PLANNING PRIORITIZATION

The District's Mission Statement and corresponding goals provide the overall policy direction for District staff to manage and prioritize its operations and projects.

The primary objectives related to the District's goals are as follows:

- A. Water Supply—Ensure long-term water supply for all users
- B. System Reliability—Ensure that the District's existing and planned water supply, conveyance, and recharge systems meet regional needs, including emergency response
- C. **Regulatory and Environmental Compliance**—Ensure long-term sustainability of all water sources within the District while complying with all regulations
- D. Fiscal Responsibility—Protect current and future value of District resources in a transparent, timely and accurate fashion while adhering to all applicable legal, ethical and government accounting standards
- E. Regional Partnerships and Leadership—Work collaboratively with local jurisdictions, agencies, and stakeholders to provide cost-effective water supply solutions
- F. Communications and Community Outreach—Promote awareness and understanding of the District's mission, programs and priority projects to raise the District profile and credibility with customers and constituents.
- G. Organizational Effectiveness-Increase UWCD's organizational capacity to meet current and future challenges.

The mission of the District continues to focus on water resource sustainability, reliability and quality while dealing with regional issues such as groundwater overdraft, seawater intrusion and abatement, and water resource management to balance the needs of people and the environment, as it is required by law, for the public health and safety of the people of the State of California.

For additional information please see the District's Strategic Plan in the final tab of this document.

DEPARTMENT RESPONSIBILITIES

ADMINISTRATIVE SERVICES is responsible for human resources, information technology, risk management and general administration of the District. Administrative Services oversees the management of the administrative office and staff, Board of Directors meetings, information technology, human resources, and risk management.

FINANCE is responsible for all financial matters and activities for the District including accounting, budgeting, accounts receivable and payable, investments, payroll, financial analysis, and financial reporting.

ENVIRONMENTAL PLANNING AND CONSER-VATION is responsible for ensuring that United is in compliance with various environmental laws including Endangered Species Act, Clean Water Act, California Environmental Quality Act, and California's Department of Fish and Wildlife Code to allow for continued groundwater conservation efforts. The department manages fish passage facilities at the Freeman Diversion and conducts monitoring and studies of biological and physical conditions in support of United's permits.

ENGINEERING AND GROUNDWATER RE-SOURCES is responsible for developing water conservation infrastructure and providing hydrogeological expertise to assist the District in managing groundwater resources. Engineering staff focuses on the planning, design and construction of capital improvements, technical monitoring of existing infrastructures, right-of-way administration, and general technical assistance to operations and recreation activities. Groundwater staff performs water level measurements and water quality sampling and analysis on hundreds of wells each year, maintains and updates the regional groundwater flow model, performs field investigations to improve the District's understanding of the controls on groundwater flow, evaluates the impacts of groundwater utilization and conservation options on resource availability, and serves as an in-house technical resource on groundwater supply, water quality, and water resource management. The department also has lead responsibility for the District's responsibilities related to the Santa Paula Technical Advisory Committee and implementation of the Sustainable Groundwater Management Act of 2014.

OPERATIONS AND MAINTENANCE is responsible for operating and maintaining the District's water resource facilities including Lake Piru's potable water system, Santa Felicia Dam and Hydro Plant, the Piru Diversion and Spreading Grounds, the Freeman Diversion, the Saticoy and El Rio Spreading Grounds, the Oxnard-Hueneme Drinking Water System, the PTP Agricultural Irrigation System, the Pleasant Valley Pipeline and the Saticoy Groundwater Storage Management Project

(The District's Recreation Operations at Lake Piru fall under the responsibilities of the Assistant General Manager.)

Recreation irrigation water (\$680.33)									

¹

¹ - The O/H Pipeline contract calls for fixed costs to be billed per unit of peak capacity. Variable and marginal costs are billed per acre foot of water delivered. Therefore, the total cost per acre foot depends on the volume of deliveries and will vary by contractor.

² - Pipeline users pay Zone A and Zone B extraction charges and water purchase surcharge listed above as well as the pipeline-specific charges.

³ - Applies to the difference of the allocation less actual water deliveries.

⁴ - Rate applies only to PTP turnouts above elevation 58.5 instead of the PTP Fixed Cost - Monthly Rate.

⁵ - Per acre foot for each agency's 75% sub-allocation. Refer to O/H Pipeline Fund.

⁶ - The PTP Surcharge = equivalent to FCGMA groundwater extraction surcharge rates, on a pro rata basis, in an amount to reimburse the District for 100% of potential FCGMA surcharge.

⁷ - The three PVP customers have a minimum \$17/month service charge.

⁸ - This rate is set by the Fox Canyon GMA and subject to change. Also applies to all Saticoy Well Field deliveries.

DEFINITIONS

Appropriations

A legislative authorization that permits government agencies to incur obligations and to make payments out of the treasury for specified purposes.

Annual Budget

Revenue and expenditure spending plan presented for one fiscal year period.

Capital Improvement Projects (CIP)

Construction or improvements to facilities and property, which are generally one time in nature and usually require design and engineering services. The projects may require purchase of land or right-of-way (ROW) and usually cost in excess of \$10,000. Financing is sometimes used to fund the projects and have long-term return on the investment. The projects may take several years to complete and/or fund.

Capital Outlay

Purchase of a tangible asset with a cost of \$5,000 or more and useful life of two years or more.

Carry Over (Encumbrance)

Authorization by legislative body to carry forward spending authority (appropriation) from one year to another.

Cash Reserves/Working Capital

Available resources, within a fund, accumulated over time, which are not restricted to a specific purpose and therefore may be used to fund operating expenses of the fund.

Debt Service

Principal and interest payments to repay a loan.

Electricity Sales Revenue

Revenue received from Southern California Edison for purchase of electricity produced by the District's hydroelectric plant at Santa Felicia Dam.

Fiscal Year

July 1 through June 30

Groundwater Revenue

Revenue (District-wide Water Conservation and Freeman groundwater extraction charge per acre-foot) received for water pumped directly from the ground by a well operator/owner.

Required Reserves

A portion of working capital required by board policy and/or binding agreement to be set aside or restricted for specific purposes. Reserves are not available for operating expenditures.

Transfers In – Out

An exchange of cash from one operating fund to another.

Water Deliveries Revenue

Revenues received from customers for water delivered through one of the three District Pipelines – that is based on an "In Lieu of Replenishment Charge", which represents District-wide and Freeman groundwater extraction charges levied per acre-foot on pipeline deliveries versus well operator/owner direct pumping near the coastline.

Oxnard Hueneme Pipeline Pleasant Valley Pipeline Pumping Trough Pipeline

FY 2020-21 ADOPTED BUDGET

GENERAL/WATER CONSERVATION

GENERAL/WATER CONSERVATION FUND

United Water Conservation District (UWCD) is a legislatively established Water Conservation Districts in the State of California. The District's principal act is the Water Conservation District Law of 1931 (Water Code Section 74000 et seq.). An essential responsibility of the District is to protect and augment groundwater supplies necessary for the public health, welfare and safety of the people of the State of California. The responsibility directly arises from Article X, Section 2 of the California Constitution, which among other things provides that the general welfare requires the water resources of the State to be put to beneficial use to the fullest capable extent possible, that waste or unreasonable use of water be prevented, and that conservation of waters is to be exercised recognizing reasonable and beneficial use in the interest of the people of the State for the public welfare. UWCD is <u>not</u> a Municipal Water District, Wholesaler/Retail Water purveyor, or a general government service provider.

The fundamental mission of the District has not changed since the District was reformed under the Water Conservation Article Law of 1931, although the funding model for its water conservation efforts was legislatively amended in 1979 in recognition of its critical responsibilities. Because of its status as a water conservation district and funding authorities, financial reporting is unique as the District attempts to comply and distinguish its water conservation authority mandate, as provided for in the California Water Code, and the District's governmental status that requires it to comply with Generally Accepted Accounting Principles. In an effort to provide clarity and transparency for its unique status and for budgeting purposes, the General/Water Conservation Fund is broken down into the following activities. The descriptions below of each activity are meant to summarize, for clarification as to their separate financial reporting, and therefore are not all inclusive.

WATER CONSERVATION ACTIVITIES (ZONE A)

Represents the revenues and expenditures directly related to the District's statutory responsibilities and authorities, including those activities/mandates required to perform its water conservation efforts. For example:

- Collection of groundwater extraction charges, district-wide (Zone A), as authorized by California Water Code Section 75500 et. seq. This Collection of groundwater extraction charges is based on groundwater extraction via agricultural or municipal industrial use throughout the District (groundwater) or delivery of Santa Clara River surface water/UWCD extracted groundwater via three pipelines that are utilized by the District to minimize groundwater pumping near the coastline in an effort to abate seawater intrusion into groundwater aquifers (water delivery). Zone A is established each year by the Board of Directors in recognition that all of the groundwater basins within the District are hydrogeologically connected and have impact on one another.
- Consistent with Water Code Sections 75521-75522, groundwater charges levied by the District are in furtherance of its efforts to protect and augment water supplies, and are for

the benefit of all who rely directly or indirectly upon groundwater suppliers of the District or its zone(s) and water imported into the District or its zone(s).

- Under the General Operating Activities below, the District first utilizes its Ad Valorem Property Tax receipts per the Board's discretion, to fund expenditures that are deemed indirect support for District-wide water conservation efforts. Any property tax revenues remaining upon funding these indirect support costs are used to offset water conservation activity (Zone A) costs.
- Supplemental Water Revenue UWCD groundwater storage credits (authorized by the Fox Canyon Groundwater Management Agency (FCGMA) as a result of the District's purchase of imported State Water used to replenish the groundwater in the forebay) provided to other groundwater extraction facilities, in return for compensation, to promote sound groundwater management strategies.
- Maintenance of the District's various spreading grounds (Piru, Saticoy, Ferro, Noble, Rose and El Rio) which provide District-wide benefits.
- Expenses related to the Santa Felicia Dam, including mandated environmental costs, dam safety and the hydroelectric plant (costs not covered by ad valorem property taxes).
- Development and management of upper Santa Clara River activities affecting issues in the Piru, Fillmore, and Santa Paula Basins.
- Expenses related to the Saticoy Well Field, established and used as a groundwater management facility.
- All environmental compliance costs as outlined in the Board's Environmental Cost Allocation Policy.
- Engineering services, debt service, overall groundwater management efforts, and capital assets and replacement costs that support the District-wide water conservation efforts.

GENERAL OPERATING ACTIVITIES

- Used to account for all Financial Resources and expenditures of the District that indirectly support District-wide water conservation efforts in Zone A – This does not include indirect administrative costs that provide support to all District activities (funds) that are accounted for and allocated proportionally in the Overhead Fund.
- Used to account for all other financial activities of the District that are not required by law, administrative action or Generally Accepted Accounting Principles (GAAP) to be accounted for in another fund, including hydro-electric plant generation revenues.
- Ad Valorem Property Taxes are initially appropriated by the Board of Directors, per their legal authority and at their discretion, as deemed necessary for indirect costs that directly support or are required for the District-wide water conservation activities. If the District's ad valorem property tax revenues are insufficient to cover these indirect water conservation costs, groundwater extraction charges may be used, if approved by the Board of Directors, for:
 - Legal (not associated with water conservation, Board matters or an Enterprise Fund activity)

- O Legislative costs
- O Public information, legal notices, etc.
- O Training, conference, education and meeting costs
- O Office expenses
- O Memberships to ACWA, AWA, Watershed Coalition of Ventura County (IRWMP)
- O Property tax collection fees (County of Ventura)
- O LAFCO costs allocated to District
- O Recreation Activities (including potable water services) at Lake Piru
- O Hydro-electric plant at Santa Felicia Dam
- District-wide Federal Emergency Management Administration (FEMA) effort related to natural disasters unless the costs are directly related to the other operating funds.

RECREATION ACTIVITIES

As part of the approval process to construct the Santa Felicia Dam in 1955 and to comply with the requirements of Federal Energy Regulatory Commission license for the SFD hydro-electric plant, the District must provide recreational access/use of the Lake Piru area. The District contracts with an independent concessionaire to provide all recreational services (i.e. boat, camping, food services, dry storage, etc.) and park maintenance at Lake Piru Recreation Area. The District may receive a percentage of the concessionaire's revenue for the contracting rights and for landlord (District) maintenance costs. The District directly provides Public Service Officers' services for boating safety and enforcement of District established park rules, and constructs, maintains and operates the lake's potable water system using a portion of the District's dvalorem property taxes and revenues from the concessionaire. These provided services are performed to limit the District's liability exposure while attempting to reduce the District's cost related to providing the required recreational access/use of its Lake Piru Reservoir. All costs and revenues directly related to the Recreation Activities are included in the General/Water Conservation Fund, but also reported separately as a subsidiary fund for accountability purposes.

WATER PURCHASE FUND

The District utilizes this fund to account for the financial resources and expenditures related to the purchase of water beyond the District's State Water Project Table A allocation. The District assesses a water purchase surcharge on all groundwater pumping and pipeline deliveries. These funds are committed for the purchase of water and cannot be used for any other purpose. All costs and revenues directly related to the Water Purchase Fund are included in the General/Water Conservation Fund, but also reported separately as a subsidiary fund for accountability purposes.

FY 2020-21 ADOPTED BUDGET OVERHEAD FUND

Overhead Fund Allocation Methodology

OVERHEAD FUND

The District Overhead Fund is used to account for administrative costs such as salaries of office personnel, accounting, financial reporting and miscellaneous expenses of the District's main office in Santa Paula in support of the five operating funds' activities (i.e. General/Water Conservation, Freeman, Oxnard-Hueneme Pipeline, Pleasant Valley, and Pumping Trough Pipeline). Specific operating funds of the District incur a prorated share of the administrative costs calculated by a Board of Directors and customer approved cost allocation method. This cost allocation method is based on an equally weighted average of the last completed year's billings, labor hours, accounts payable transactions, and revenues.

SPECIAL REVENUE FUND

State Water Project Importation Fund

State Water Project Article 21 Water Release from Pyramid Lake to Lake Piru

SPECIAL REVENUE FUND

Special Revenue Fund is used to account for the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes other than debt service or capital projects.

THE STATE WATER IMPORT FUND

The District utilizes this fund to account for the financial resources and expenditures that are necessary to pay for the District's annual water allocation from the State Water Project. The primary resource for this fund is a voter approved property tax assessment that is determined annually, based on the amount of State Water the District intends to purchase, and the estimated associated fixed/variable costs. These costs are determined each year for the District's share of the County's contractual agreement with the State's Department of Water Resources.

The District's annual importation of its Table A State Water allocation is used for the sole purpose of increasing the recharge of groundwater basins in the District, beyond what water is naturally available within the Santa Clara River watershed. This added recharge, paid through the voter approved property tax special assessment, benefits <u>all</u> groundwater basins District-wide. City residents in Oxnard and Ventura are not subject to this property tax assessment since they have their own State Water Table A allocations; yet these residents receive the benefit of the District-wide recharge from such water. Any cost incurred in an effort by the District to enhance imported water deliveries, beyond the District's Table A, allocation is paid out of the Water Purchase Fund or the General/Water Conservation Fund.

FY 2020-21 ADOPTED BUDGET

ENTERPRISE FUNDS

Freeman Diversion Fund Oxnard/Hueneme Pipeline Fund Pleasant Valley Pipeline Fund Pumping Trough Pipeline Fund

ENTERPRISE FUNDS

Enterprise Funds are used in governmental accounting when the function of providing the service or product is conducted like private business in that a fee is charged for the service or product and the fee is sufficient to support the costs of providing the service or product. The District uses four (4) Enterprise Funds to account for activities which support the District's primary mission of managing and enhancing the groundwater aquifers and reducing seawater intrusion.

THE FREEMAN DIVERSION FUND (ZONE B)

The Freeman Diversion Dam is used to divert and efficiently manage run-off water from the Santa Clara River. The diversion of river (surface) water increases water availability that directly enhances the District's ability to recharge groundwater and reduce seawater intrusion in groundwater aquifers. The fund is used by the District to account for the financial resources and expenditures that result from the operation and maintenance of the Freeman Diversion facilities. Revenue for the fund comes from a separate groundwater extraction fee.

PIPELINE FUNDS

The three (3) pipelines operated by the District are not established zones but are all located within both Zone A (Water Conservation Fund – district-wide) and Zone B (Freeman Diversion Fund). The pipelines are part of the <u>strategic water conservation facilities</u> the District utilizes to fight seawater intrusion and protect the groundwater aquifers within the District's boundaries. The pipelines provide the District the ability to minimize/eliminate significant groundwater extractions by both municipal and agricultural water users from their groundwater extraction facilities near or along the coastline that would expedite seawater intrusion into groundwater aquifers. The "in-lieu of groundwater extraction" water deliveries of Santa Clara River surface water and/or Oxnard forebay groundwater via these pipelines come from an area within the District (forebay) in which the shallow aquifer is easily recharged when surface water is available. The customers on these pipelines pay not only the Zone A and Zone B groundwater extraction charges but also 100% of the operating and maintenance delivery charge, including operations and maintenance costs if the Saticoy Well Field is used, for each acre-foot of water delivered by the District.

THE OXNARD HUENEME PIPELINE FUND

The fund is used to account for the resources and costs of operating and maintaining of the Oxnard Hueneme pipeline. The District delivers potable water via groundwater treatment to the Oxnard Hueneme area. The pipeline delivers water for municipal, industrial and agricultural uses. Resources for the costs of managing and maintaining the Oxnard Hueneme pipeline are derived from the customers who directly benefit from the delivery of the water.

THE PLEASANT VALLEY PIPELINE FUND

The fund is used to account for the resources and costs of operating and maintaining of the Pleasant Valley pipeline. The District diverts surface water at the Freeman Diversion and transports it via the pipeline to the Pleasant Valley County Water District (PVCWD) for agricultural use. Revenues are primarily generated from fees paid by the PVCWD and its customers. Expenditures

for the fund include operations, maintenance, improvements and a portion (50%) of the District's moss screen facility.

THE PUMPING TROUGH PIPELINE FUND

The fund is used to account for the resources and costs of operating and maintaining the Pumping Trough pipeline (PTP). The PTP provides a combination of Santa Clara River surface water, Forebay groundwater (Saticoy Wellfield), and Fox Canyon aquifer water in an over pumped area of the Oxnard Plain. Revenues are generated from fees and cover the costs of operations and maintenance of the pipeline and a portion (50%) of the District's moss screen facility.

CAPITAL IMPROVEMENT PROJECTS

Capital Improvement Projects Budget Summary

Five Year Plan

Capital Improvement Project Details

CAPITAL IMPROVEMENT PROJECTS

Capital Improvement Projects (CIP) are established to account for financial resources that are proportionately designated to fund(s) for the acquisition or construction of District major capital facilities and improvements. The capital improvement budget and five-year capital improvement project plan are presented in this section. Only the first year of the plan is actually funded and appropriation authority is provided by the Board of Directors as part of each annual budget adoption. However, once approved, Board authorized appropriations carry over from year to year until expended or the project is completed or eliminated (i.e. no longer necessary).

CIP costs are proportionately allocated based on their estimated benefit to District-wide water conservation activities (Zone A); Freeman Fund activities (Zone B groundwater extraction charge); or the three (3) enterprise pipeline funds (O&M delivery charge) operations.

Need Benefit, and Relation to Existing Facilities	California rainfall mode 220,000 cfs. Both DSC	el (HMR-58/59). The 2006 PMF in DD and FERC directed the District at the model was flawed and over	m flood of 105,000 cfs. The PMF increased dramatically following application flow was determined to be 321,000 cfs. California Division of Safety of Dams to reduce the risk of failure using the modified inflow as inflow design flood (I ly conservative. The District retained GEI Consultants in 2013 to perform a for	(DSOD) calculated a "modified" PMF inflow of DF). A site-specific study of the Piru Creek
Current Status	walls. The GEI Consult FERC in 2015. The Phi for spillway modification alternative for spillway replacing the spillway of analyses multiple altern design packet was sub	tants (GEI) perform a feasibility str ase II Study that followed the feasi ns. In 2018, the results were press modifications include preserving t chute downstream of the ogee cre natives for retrofitting the existing pritted to DSOD and FERC in Ma	o pass the IDF of 220,000 cfs. The purpose of the spillway modification is to sudy to evaluate alternatives to mitigate the hydraulic deficiency of the existing sibility study developed conceptual designs for four different spillway modifica ented to the Board of Consultants (BOC) who provides peer review and qualities the existing ogee spillway crest, preserving the existing spillway walls and wal set, and raising the embankment dam crest. The design efforts were advance east spillway wall were identified. The results of the 10% design were preserving the 2020. Future design milestones are anticipated to be at 30, 60, 90, and 1 Year 2020/21. Construction of the spillway modifications is anticipated to beg	g spillway. The findings were presented to DSOD and titions and identified the preferred design alternative ty assurance of the design. The preferred design Il footings, raising the existing walls elevation and ed to 10% design in 2019 and based on further ted to the BOC in December 2019 and the final 10% 100% completion levels and the 30% design

Project Name:	SFD Sediment Ma	anagement	Mission-Related Goal: B. System Reliability	Project Number 800
Department:	Engineering	400	Strategic Objective: B1	Fund Charged 05
			Project Description	
Description	Develop a long term	strategy for the sedimentation of I	Lake Piru. This could involve removal, relocation and/or in-place stabilization.	
Need Benefit, and Relation to Existing Facilities	is scheduled for 2020	. The volume of accumulated sec	with the next survey scheduled for 2026. There will be an opportunity to check the diment is large. Each unit of sediment removed from below the operational water s ques is expected to exceed \$1,600/ AF for adjacent benching.	e sediment as part of the bathymetric survey that surface lends a like unit to usable water storage.
Current Status	No significant activity	has occurred. Staff plans to con	duct a feasibility study for removal of sediment from Lake Piru as part of the SFD	Jutlet Works Rehab project.

Project Name:	Floc Building Emer	gency Generator	Mission-Related Goal: B. System Reliability	Project Number	8033
Department:	Engineering	400	Strategic Objective: B1	Fund Charged	421
			Project Description		
Description	Purchase and installatio	on of an emergency generator fo	r the Floc building at the Freeman Diversion.		
Need Benefit, and	Southern California Edis	son has implemented a Public S	afety Power Shutdown (PSPS) program that could interrupt power service for	several hours to several days. This pro	oosal would
Relation to Existing	support continuous serv	vice during planned and unplann	ed power outage incidents. Engineering staff submitted a Notice of Interest (N	OI) to Cal Office of Emergency Service	s' Hazard
Facilities	Mitigation Grant Program	m (HMGP) in July 2019. Upon re Piru Water Treatment Plant and	ecceipt of the CalOES HMGP invitation, staff submitted a grant application for a the Santa Paula Communication Tower in 2019. If awarded, the funding pays	district wide emergency backup generative to 75% of the project costs	ators for the
	Tioc Building, the Lake I		the Santa Padia Communication Tower in 2019. If awarded, the funding pays

District Map & Area Pipeline Delivery History Groundwater Pumping by Zone Lake Piru Water Storage Capacity/Fall Release

Agriculture is a multi-billion dollar industry in Ventura County and strawberries are its most valuable crop. Farmers rely on UWCD to monitor and protect their groundwater resources from seawater intrusion and other contaminants, and to develop a sustainable water supply for the future in the most cost efficient way possible.
