INVITATION TO BID

OXNARD HUENEME SYSTEM BACKUP GENERATOR PROJECT (SPECIFICATION NO. 20-06)

- Bid Due Date (Revised):** February 22, 2021 no later than 2:00 P.M. (PST)
- Project Description:** United Water Conservation District (UWCD) is planning to install a new backup diesel-powered generator at UWCD's El Rio Water Treatment and Groundwater Recharge Facility. The new 800 kW backup generator will supply power to the Oxnard Hueneme Pipeline (OH) System to maintain potable water supply to the District's customers via the OH System during SCE Public Safety Power Shutdown (PSPS) events. The contractor shall remove the existing 750 kW diesel generator and install the new generator. The new generator is furnished by UWCD. Time is of the essence. The project completion is expected by August 26, 2021. A detailed description of work is included in the Contract Specification documents (Specification No. 20-06). In order to receive a copy of Specification No. 20-06, please contact Michel Kadah, P.E., michelk@unitedwater.org
- Project Location:** The Project is located at UWCD's El Rio Water Treatment and Groundwater Recharge Facility at 3561 North Rose Avenue, Oxnard, CA 93036.
- Submission of Bids (Revised):** All sealed bids shall be submitted to United Water Conservation District office located at 1701 North Lombard Street, Suite 200, Oxnard, CA 93030.
- Prebid Site Inspection (Revised):** Contact Michel Kadah at michelk@unitedwater.org to schedule appointment to visit the site.
- Bid Questions/Clarification (Revised):** February 15, 2021 no later than 5:00 P.M. (PST). Questions pertaining to the bids shall be submitted via email to Michel Kadah, P.E., michelk@unitedwater.org
