

IMPROVEMENTS ARE COMING *Lake Piru* RECREATION AREA

Located in the Los Padres National Forest and Topatopa Mountains in Ventura County, California, Lake Piru reservoir offers ample outdoor recreation opportunities.

BACKGROUND

The Santa Felicia Dam was constructed in 1955, creating Lake Piru. The United Water Conservation District (United Water) owns and operates the Dam and the surrounding Lake Piru Recreation Area. Home to lakeside picnicking, camping, fishing, boating, and water sports, the area offers a vital escape from city life. United Water will improve the Recreation Area to enhance the Lake Piru experience.

OUR GOAL

United Water is in the planning stages of upgrading the Lake Piru Recreation Area, including 236 campsites with full water and sewer hookups. The District has developed a long-term vision for the revitalization of the campground.

Visitors can expect cost-effective enhancements that prioritize safety and comfort above all, making Lake Piru Recreation Area a destination worth the trek.

OPTIONS & OPPORTUNITIES

United Water is promoting discovery and community at the Recreation Area.

Charming nature trail, amphitheater for gathering, and pristine community areas

Group campsite for retreats and large excursions

Upgraded restrooms, holding tanks, and roadways

17 full hook-up RV campsites, plus 9 electric hook-up RV campsites

Increase revenue and community interest

The plan addresses the current water and wastewater systems in the recreation area as well as electrical systems. The design is only 10 percent completed — there is still a lot of exciting work in the planning process.

RECREATION AREA ENHANCEMENTS

Grand, multi-campground plan
developed in concept and phasing

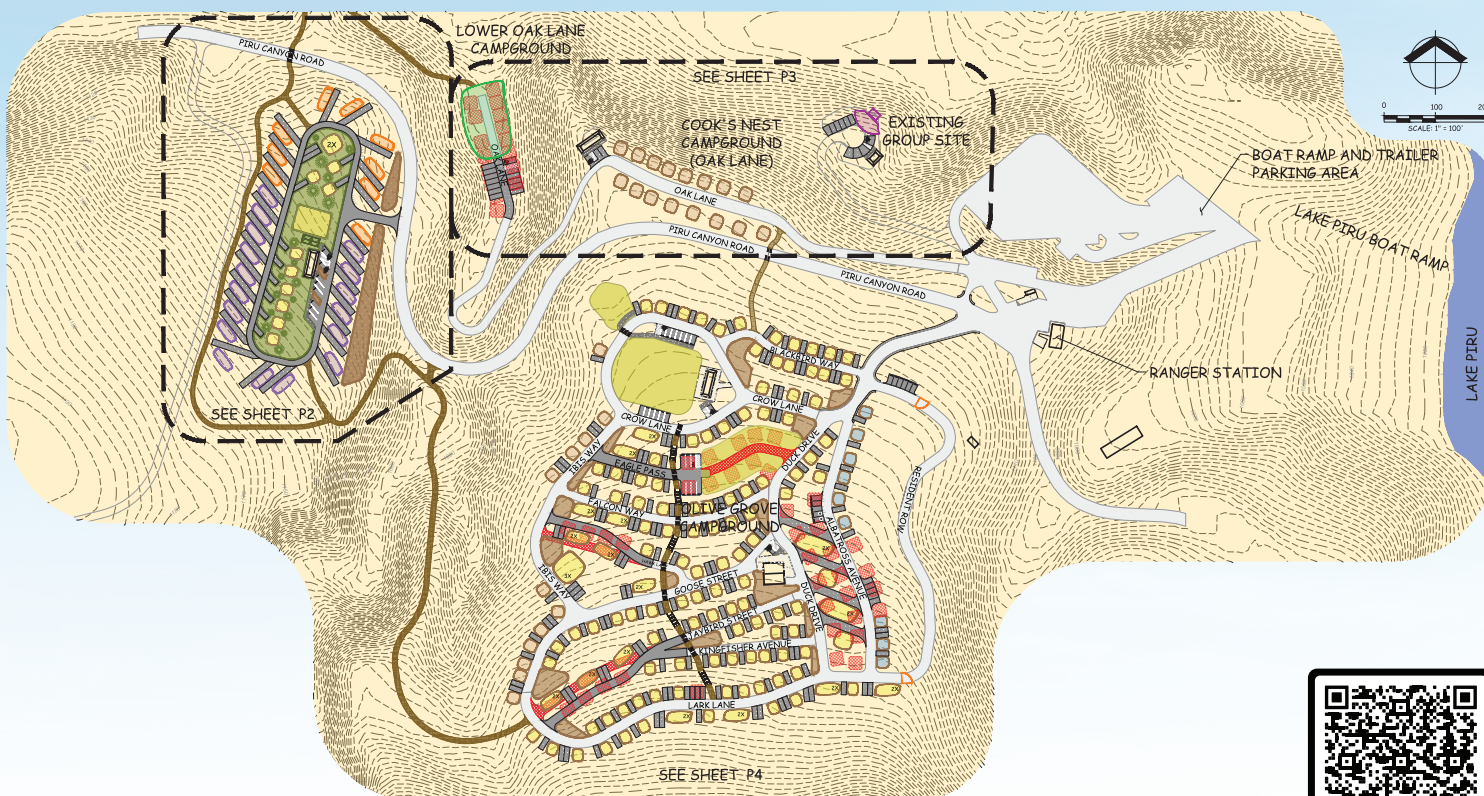

Features three campgrounds —
Olive Grove, Cook's Nest, and
Kittanemuk, designed to meet overflow
demand

Brings total electric hook-up campsites
from 96 to 119

Adds 34 double electric hook-up
campsites and 3 triple electric hook-up
campsites
