

## Appendix I: List of Suggested AMI-Compatible Flowmeters

Provided on the following four pages. The CGSA has obtained estimates on AMI-Compatible Flowmeters. This list is not complete and other makes and models may be compatible with the AMI-system; contact the CGSA to inquire about additional makes and models if you have any questions. These estimates are dated, and all prices are based on the date received and may no longer be valid. Tariffs may impact these prices.

Property owners are not limited to purchasing meters from these companies. This list is providing to assist property owners with fulfilling the requirements of this Policy and provide contact information and pricing where available.

## Appendix K: Maximum Flow and Pressure for Meter Sizes

When data is finalized in the List of Suggested AMI-Compatible Flowmeters Appendix I, this table can be updated and finalized.

Meter Size (inches)	Average Maximum Flow (gpm)*	Average Maximum Pressure (psi)*	Number of Observations
0.75	32	175	1
1	83	163	2
1.5	160	195	5
2	206	189	7
3	566	179	7
4	963	186	7
6	1,965	183	6
8	3,413	188	4
10	5,286	188	4
12	8,385	175	2

This data is limited to the information pulled from meters presented in the Suggested AMI-Compatible Flowmeter Table (**APPENDIX I**). It is the owner's responsibility to determine the maximum flow and maximum pressure for their specific AMI-compatible flowmeter to ensure that it works with their system. If the meter manufacturer specifies both a maximum continuous operation flow and a maximum intermittent operation flow, the property owner must utilize the maximum continuous operation flow value to determine the maximum flow through the meter.

## Appendix M: List of Approved Flowmeter Accuracy Testing Contractors

Company Name	Contact Name	Phone Number	E-mail

This list is not necessarily up to date and the CGSA does not recommend, endorse, or warrant the work of any individual or company listed. Not all companies may be insured. The information listed may have changed and it is the owner's responsibility to ensure that all work is done in accordance with this Policy and that the flowmeter is installed to meet flowmeter requirements. The property owner is not required to use these companies and may use alternate companies if desired or do the installation themselves. All work must be done in accordance with the manufacturer's specifications.
